

Building your vessel step by step

1. Develop your **idea** first!

2. Divide your clay into four pieces: one for a **base**, two for **coils**, and one for **everything else** and for emergencies.

3. Make the **bottom**: a disc of clay that is 1-1.5 cm thick and 7-10 cm in diameter. **Store any leftovers** in your bag.

7. **Stretch** the coils by **spreading** your fingers while rolling.

8. **Smear** your coils together using only **one finger** or one thumb.

9. **Don't pinch** on either side because you will make your pot very dry and thin.

13. Add a **foot** by attaching a coil.

14. **Scribe** and then **trim the lip**.

15. Coat your pot with **white slip**. Let it dry and add coats until there are **no streaks**.

4. Keep it fairly **rough** because smoothing it will dry it out.

5. Make a series of **coils** that are about 1-1.5cm thick.

6. Remember that you are **not squeezing** the coils. **Work quickly!**

10. **Smooth the inside** with your **fingers**. If you can't reach, it is OK.

11. Shape your vessel by **paddling** it with a wooden spoon or stick.

12. Shave it with a **knife**. Then **smooth** it with a metal/plastic/silicone **rib**.

16. Do a very **light rough sketch** of your drawing on your pot.

17. Take a sharpened pencil and **carve through the slip** into the brown clay.

18. Finally, carve your **name** on the bottom.
