What I've learned about starting my painting...

Before you start your good copy, you need to:

1. Print your **reference photos**
2. Select 1-4 colours for your **colour scheme**
3. Build your skills making a **rough copy** with your photos and colour scheme

Start your painting by:

1. Drawing a **light rectangle** on your good copy paper
2. Making a **rough sketch** on your paper of your artwork
 - a. Watercolour paper is too thick for detail on the light table
3. Decide if there are **light areas** that need masking with tape or fluid
4. Add the first layer of paint to your **background first**, then your foreground

Remember to paint with THIN layers

Watercolour painting basics - **Apple** Name: _____

Watercolour works best when you paint from light to dark. This is the opposite of drawing. This worksheet is to help you see the different shapes of light and dark in objects.

If this is your first time, simply use thin layers of the same colour. Otherwise, try going from a warm colour, like light orange, to a cool colour, like dark purple.

1. A very thin layer of lights first

2. Let it dry, then add light greys

3. Let that dry, then add dark greys

4. Then add the darkest greys
